

**PPE Equipment
and staying safe**

We have invested over £90,000 on PPE to keep our staff and passengers as safe as possible while in our vehicles. We understand the importance school transport for both mainstream and special schools. Safety is always paramount to our working day ensuring you feel safe within our vehicles, is not only Necessary but even more essential at this moment in time.

Please take as many precautions as possible when using our transport, with the suggestion of sanitizers and where possible some form of face coverings, giving our staff the confidence that awareness of Covid – 19 is prominent amongst all our passengers. Studies confirm wearing a face mask/covering at all times will trap 95% of the viral load limiting transmission.

We are currently operating with one passenger per row of seats (this will change as the guidelines are relaxed expected to be for June 1st 2020), ensuring we can keep distancing to a maximum, we also ask that you use the same entrance door and seat for every journey.

All vehicles are sanitized, including all touch points like seat buckles and door handles.

Rest assured of our commitment to supplying safe transport for yourselves, giving you the confidence to be able to send your children to school with the knowledge that they are in a safe environment.

We may turn up like the picture above but don't be scared we are Just trying to keep everybody safe, and we ask you to do the same for us.

(If your child or anybody in your household is showing any symptoms please do not let your child travel)

Stay safe and we will see you again soon
